

## **What CTPS Is Doing To Help Protect Our Customers Against Covid-19**

Our techs are fully stocked with heavy duty latex gloves, foot covers and masks where needed. Our techs are replacing gloves and foot covers on each job. Also, CTPS is having weekly meetings and posting to wash hands properly, thoroughly, and often. We are instructing ALL employees to disinfect trucks, tools, and phones on a regular basis during each day.

CTPS is also checking everyone for fever before entering our facility. This is in hope to help protect our customers as well as ourselves.
